

Right now there are many electric vehicle models available in BC. So you can be economical if you want, or full on fancy. Go solo or take the family.

Have luxury or practicality (or a little bit of both).

Battery Electric Vehicles

These vehicles use a rechargeable battery to run. Simple!

These vehicles have electric motors and produce electricity from hydrogen.

Toyota Mirai

MSRP \$54,550 Range 647km

Hyundai Nexo

MSRP \$72,500 Range 612km

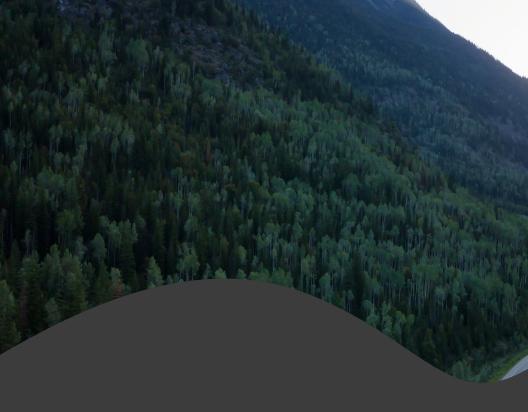

Learn about EVs in BC at EmotiveBC.ca

Answers to common questions about EVs and charging stations can be found in our FAQ section, plus you can find examples of EV drivers from all around BC and events in communities across the province.

About price and battery range.

Vehicles in this guide are presented in order of price within their category. We have indicated multiple prices in cases where vehicles have multiple battery options or ranges. These are Manufacturer Suggested Retail Prices (MSRPs) and do not account for additional trim levels or options that increase price without increasing range. In some cases there are even more battery and price options within the range that we present, and higher MSRPs do not always correspond with higher ranges.
